SUMMARY

Full-Stack Engineer with 4+ years shipping React/TypeScript and Python/FastAPI products across HR-tech, supply chain, and healthcare. Leading contributor on a live cross-platform product — owning features end-to-end across React 19 web, React Native mobile, and FastAPI backends in an Nx monorepo. Also architects AI-assisted development for a 40-person team, from MCP tooling to agent harnesses that generate production-ready code. Turns ambiguous scope into reliable, standards-driven delivery.

EXPERIENCE

Divami Design Labs

Aug 2022 – Present

Software Engineer

Kapwa — genhrx.ai · HR-tech Platform — Mar 2026 – Present

Nx · React 19 · Vite · MUI v7 · React Native · Expo · TypeScript · Python · FastAPI · SQLAlchemy · Alembic · Playwright

- Own features **end-to-end across the full stack** on a live cross-platform product — from a FastAPI/SQLAlchemy backend through a shared TypeScript library to React 19 web and React Native/Expo mobile, all in one Nx monorepo
- Set up the **project from scratch** and engineered its AI-agent development harness — rules, hooks, workflows, and custom skills — so the **majority of production code ships agent-generated** to the team's standards
- Built the **API test-automation suite from scratch** — contract and payload-type validation across **8+ backend modules** (chat, vendor, profile, decision-room, settings, admin, audit-log) — materially cutting manual QA effort
- Led a codebase-wide design-system consolidation — **standardized 20+ typed, reusable component wrappers** with tokenized brand styling, cutting UI duplication across the app

AI-Assisted Development & Team Enablement — Jan 2025 – Present

- Drove AI-assisted development across the **full 40-person design team** — configured MCP servers (Figma, Browser, Context7) so agents read and write design files, browse docs, and pull live library context
- Built the team's reusable AI tooling — custom skills, plugins, rules, and hooks for component generation, spec-driven development, and design-system audits
- Trained **all 40** in prompt and context engineering and authored the internal agentic-workflow playbooks — taking the team from zero to independently shipping production-aligned output

Blue Yonder — Luminate Platform · Contract — Sep 2024 – Dec 2024

- Re-architected the Multi-KPI Card into a pluggable-chart component with filtering and card-to-card communication — **reused by 4+ product teams** across the platform
- Built the Algorithm Manager UI from scratch to configure and visualize sequencing rules — optimized rendering performance and drove API integration with the backend team
- Delivered the Manufacturing Order and Parts production-planning modules across multiple sprints with **zero critical post-release defects**

Reventics — RevCDI · Contract — Feb 2023 – Jan 2024

- Built **15+ features** from scratch — dashboards, data visualizations, and reporting views over complex healthcare data
- Owned the task-queue module end-to-end from design to deployment, **lifting processing efficiency ~30%**

SKILLS

FRONTEND	**React** (incl. React 19) · **TypeScript** · JavaScript (ES6+) · React Native · Expo · Redux · Context API · MUI · Micro Frontends · HTML5 · CSS3
BACKEND	**Python** · **FastAPI** · SQLAlchemy · Alembic · Node.js · Express.js · MongoDB · GraphQL · REST APIs · AWS Lambda · Serverless
BUILD / TOOLING	**Nx** (monorepo) · Vite · Webpack · pnpm · Git · GitHub Actions · CI/CD
TESTING	Jest · Playwright · Cypress · API contract testing
AI TOOLING	**Claude Code** · Cursor · GitHub Copilot · OpenAI Codex · **MCP** · Context & Prompt Engineering · Agentic Workflows
FUNDAMENTALS	Data Structures & Algorithms · System Design · Agile

EDUCATION

B.Tech, Mechanical Engineering — 2018 – 2021

TKR College of Engineering & Technology, Telangana

Full Stack Web Development — Feb 2022 – Aug 2022

10X Academy — 6-month full-time program (Data Structures, Algorithms & Full-Stack Development)
